

## Child Protection and Safeguarding Policy: Areas of concern checklist

The changes to KCSIE Para. 55 have been updated to make clear that all schools and colleges should have their own individual child protection policy. This is important, as it will reflect local circumstances. In order to ensure our school policy is compliant with KCSIE 2018 we use this list to check that we have covered areas within our policy that are specific to your school or area.
